NIMDTA CONFERENCE IS BACK

Save the date:

Friday 17th October 2025 @
Meet at the Mill,
Newtownabbey
Theme: 'Focus on Diagnosis'
Parallel program 'Supporting our patients'.

As we move towards the end of 2024, it's a perfect time to reflect on the year that has passed. This year has been filled with many rewarding events within NIMDTA and we are incredibly grateful for your continued support.

One of the significant milestones this year was the transition to MedAll, our new course booking platform. While this move presented some challenges, we are thankful to everyone who supported us during this period of change. Your patience and adaptability have been invaluable.

As we step into the new year, we are excited about the opportunities ahead. Having learned new skills and fully adapted to MedAll, we are confident that 2025 will be our most successful year yet in supporting dental health professionals across Northern Ireland. We look forward to continuing our mission of providing excellent training and resources to help you thrive in your careers.

Thank you once again for your unwavering support. Here's to a prosperous and productive new year!

Warm regards,
The NIMDTA Team

Introduction to Health Service Dentistry in NI

A course specifically designed for dentists who have qualified outside the UK and are seeking to integrate into the NI healthcare system. Delivered over 10 Wednesdays commencing in January 2025, the curriculum covers essential clinical topics including restorative dentistry, prescribing, periodontology, and understanding general dental services regulations. Participants will emerge with a deep understanding of the professional standards expected in the UK, ready to contribute positively to the dental health of their communities.

**Please help us spread awareness
of this course.**

BOOK NOW

DO YOU HAVE A TRAINEE DENTAL NURSE WITHIN YOUR PRACTICE?

Do you have a new trainee dental nurse who won't be starting a designated course until September?

Ensure they are safe and well-prepared by enrolling them on the NIMDTA 2-day Trainee Dental Nurse Course.

Designed to provide Trainee Dental Nurses with the foundational knowledge and skills needed to work safely and effectively in a dental healthcare environment before they begin a formal approved course in Dental Nursing.

£695
Belfast

Cone Beam Computed Tomography (CBCT) is an advanced x-ray technique which generates a 3D volumetric data set of the dentoalveolar region from a series of several hundred 2D projection images. CBCT has grown exponentially since it was first introduced in the 1990s. It has applications in nearly all aspects of dentistry including endodontics, oral surgery and orthodontics and has been described as the gold standard for imaging of the oral and maxillofacial region. The European Academy for Dental and Maxillofacial Radiology outline two levels of further education for CBCT. Level 1 (core) training to be undertaken by those prescribing/referring for CBCT examinations and level 2 (advanced) training by those reporting on CBCT. NIMDTA are delighted to present a Level 1 Dentoalveolar CBCT Course. This course is provided in conjunction with the British Society of Dental and Maxillofacial Radiology (BSDMFR). The course will be delivered by consultants in Dental and Maxillofacial Radiology, with extensive knowledge and experience of CBCT. These educators will cover all aspects of clinical application of CBCT for dentistry.
